### **Compliance to The International Electrochemical Commission's (IEC 61249-2-21) Requirement.**

The International Electrochemical Commission's requirement (61249-2-21) requires materials for printed boards and other interconnecting structures to contain the following maximum amount of Halogens:

- 900 ppm maximum chlorine
- 900 ppm maximum bromine
- 1500 ppm maximum total halogens

Since CMI does not manufacture printed circuit boards, we are compliant to the IEC 61249-2-21 requirement.

Signed: John B. Ings Date: 1/15/15
